Astute Release Notes November 2026 (V3.6.4)

Release Date: November 12th 2026

Reporting gets most of the attention in this release, along with a quicker Previous LMS Records page. You can now see each enrolment event's completion on the Visual Dashboard clearer, with further expansion on the Instructor-Led Training reporting.

Enhancements

- **Previous LMS Records:** the records list now loads more quickly. When you use Assign expiry date or Assign to event, you'll see how many records will change before you confirm, and the change saves straight away.
- **Visual Dashboard:** a new Percentage Completion by Event widget shows how complete each enrolment event is, lowest first, as a bar chart or a table. You'll find it under Enrolments when you add a widget, and clicking an event lists its learners.
- **Visual Dashboard:** a How to use the Visual Dashboard link now sits under Create a Dashboard when you don't have a dashboard yet, and next to Share on every dashboard.
- **Visual Dashboard:** the Percentage Completion widgets now offer Bar and Table only. Any you'd saved as a pie or doughnut now show as a bar.
- **LXP Reporting:** Report Builder has two new Instructor-Led Training summary report types, based on Course outcomes and Learner attendance & results. They show one line per learner per course, with the learner's first and most recent pass.
- **LXP Reporting:** date fields in Report Builder can now be filtered by a period counted from the day the report runs, such as the next three months.
- **LXP Reporting:** exporting a report straight after building or viewing it is now quicker.
- **Instructor-Led Training:** the Training Schedule calendar has a new *Show archived courses* tick box. Untick it to hide classes from archived courses.
- **Enrolment Events:** on Manage Enrolment Activities, each course now shows its jurisdiction next to its version, where it has one.
- **Compliance Reporting:** the *Include Archived* tick box is now called *Include Hidden*, to match Hide on the Enrolment Events page.
- **Quick Quiz:** the Question Instruction now shows above the answer options.
- **Login page:** username reminder emails are now sent faster when requested.

Bug Fixes

- **Login page:** the QR code shows again when you set up two-factor authentication.

- **Compliance Reporting:** when someone stops being head of a department, that department's learners now drop out of their Compliance Reporting too.
- **Visual Dashboard:** Enrolments not yet completed now counts only enrolments that aren't complete, and clicking it lists them with each learner's details.
- **Visual Dashboard:** Activity Breakdown by Status now shows one ring split by status when set to Pie or Doughnut.
- **Visual Dashboard:** clicking Learners not Logged In now lists the learners behind the number.
- **Visual Dashboard:** the line under a widget's title now shows the Show top number, and pie and doughnut legends keep the count and percentage in full.
- **Visual Dashboard:** moving a widget and opening Share are now quicker.
- **Certificates:** a new course with its certificate switched off no longer issues certificates.
- **Certificates:** learners now get the language version of a certificate that matches their own language, or the default if there isn't one.
- **LXP Reporting:** each learner's re-enrolment date is now worked out from their own enrolment.
- **LXP Reporting:** Copy to pack and Move to pack now work for reports on every page of a report pack.
- **LXP Reporting:** a message now shows if an export can't be created.
- **Learners:** a column added from the column picker now shows its values straight away.
- **Learner Home:** on wide screens, the light theme no longer shows grey bars down each side of the page.
- **Instructor-Led Training:** approval reminder emails no longer go out for classes that have finished or been removed.
